Editorial Guidelines

Education in debate: Comparative analysis

Paper structure

The article, in .docx or .rtf format, must not exceed **40,000 characters**, including spaces and notes (approximately 6,000 words) – excluding the abstract and bibliography.

The paper must include an **abstract** of 200 words or less in English and French. This should consist of a) a brief statement of the paper's purpose; b) a concise explanation of the research methodology and resources used; c) a summary of the research findings; d) conclusions supported by the study findings.

Submissions must be accompanied by five English and French keywords listed alphabetically. A helpful resource for finding recognized keywords in the field of education: [Thesaurus for Education Systems in Europe \(TESE\)](#)

Tables can be inserted directly into the document; graphs, maps, and photographs are provided separately (JPEG format and in high definition). Tables and figures should be numbered and referenced in the text.

The first version of the article must be **anonymous**. The author ensures that the text does not allow him/her to be identified upon reading and that the file does not include an electronic signature.

Inclusive writing

Following the rules of the University of Geneva, which hosts *Education in Debate: Comparative Analysis*, the journal adopts an inclusive and epicene writing style. You can find examples on this [website](#).

American Psychological Association (APA)

Education in Debate: Comparative Analysis uses the American Psychological Association (APA) style for all elements related to the presentation of sources, including in-text citations, bibliographic references, tables, charts, etc. Below are the main components of this style.

In the text

One author: (Damasio, 2017)

Two authors: (Bechara & Damasio, 2019)

Three or more authors: (Damasio, *et al.*, 2018)

Organization with an abbreviation

First Citation: (Institut national de santé publique du Québec [INSPQ], 2019)

Following quotes: (INSPQ, 2019)

Author named in the text

An experiment conducted by Damasio (2017) recently yielded similar results [...].

Year mentioned in the text

In 2008, a study (Rousseau & Vallerand) demonstrated that [...].

Multiple citations for the same author and year

(Veilleux, 2003a, 2003b)

Several sources cited simultaneously

(Delage & Labrecque, 2015; Poulin, 2014; Veilleux, *et al.*, 2018)

Note: In the parenthesis, place the sources in alphabetical order.

Direct quote: with page reference

(Veilleux, 2018, p. 23)

Quote a passage in full

For an excerpt from a text reproduced in its entirety, always give the author, the year, and the specific page or paragraph number (if there is no pagination) following the quoted text.

(Tremblay, 2008, p. 16)

(Lemieux & Jasmin, 2010, para. 5)

If the excerpt is less than 40 words, incorporate it directly into the text between quotation marks.

If the excerpt contains 40 words or more, present it in a separate text block without quotation marks. The paragraph of the excerpt is indented 1cm from the rest of the text.

In the bibliography

The list of references should be presented in an integrated list, in alphabetical order of the author's name. There is no separation by the type of document. Documents by the same author are listed in ascending order of year of publication. Internet links must be activated and ready to click. Below are some examples of the most frequent sources.

1. Articles

1.1 Article with DOI (Digital Object Identifier)

- Author, A., Author, B., & Author, C. (year). Title of article. *Periodical title, volume(issue), xxx-yyy*. DOI
